AI and chip design research

Experience

PhD Researcher, CEA (*Commissariat à l'Énergie Atomique et alternative*)

📅 2023/03 - 2026/07 📍 Grenoble, France

Uncertainty in Deep Learning and Hardware Design

Intern Researcher, ENS Paris Saclay SATIE Lab

📅 2022/02 - 2022/08 📍 Paris, France

Probabilistic and physics-informed machine learning for predictive maintenance with time series data

Intern Researcher, Université Paris Saclay LISN Lab

📅 2021/04 - 2021/09 📍 Paris, France

Few-shot and meta learning

Software Engineer, Cegid Talentsoft

📅 2017/11 - 2019/12 📍 Paris, France

Fullstack software development

Web Developer & Designer, Ethikonsulting

📅 2016/09 - 2017/09 📍 Paris, France

Web development, graphic design

Education

PhD, Machine Learning & Electronics,
Université Grenoble Alpes

📅 2023 - 2026 📍 Grenoble, France

Master, Computer Science & Artificial Intelligence,
Université Paris Saclay

📅 2020 - 2022 📍 Paris, France

Bachelor, Multimedia Design and Production,
Université Évry Paris Saclay

📅 2016 - 2017 📍 Paris, France

Master, International Business

Administration, ESCG Paris Business School

📅 2014 - 2016 📍 Paris, France

Bachelor, Economics and Finance, Université Sorbonne Paris Nord

📅 2011 - 2014 📍 Paris, France

Technical Skills

Machine Learning & Data Science: Python, PyTorch, Keras, TensorFlow, Jax, numpy, pandas, scikit-learn, matplotlib, seaborn, Julia

Electronic Design Automation (EDA):

Cadence Virtuoso, Eldo, VHDL

Software Development: NET: C#, ASP MVC,

JavaScript, jQuery, TypeScript, Git, SQL, Redis

Publications

Adaptive Low-Rank Ensemble: estimation of ensemble performance as a function of the size, and reduce memory size by 3 up to 6 with equal performance as traditional ensemble (patent pending, preprint available on request).

Compressed vector-matrix multiplication for Memristor-based ensemble neural networks (patented), *IEEE International Conference on Rebooting Computing 2024*: an analog in-memory computing circuit with memristor to implement vector element-wise multiplication and low-rank approximation of ensemble of neural networks ([Blog page](#)).

Probabilistic and Physics-Informed Machine Learning for Predictive Maintenance with Time Series Data, *EuroSimE 2023*: ([Code repository](#))

Meta-Album: Multi-domain Meta-Dataset for Few-Shot Image Classification, *NeurIPS 2022 Datasets and Benchmarks*: ([Website](#))

Languages

English, Français, Tiếng Việt

中文, Español, Deutsch

Hobbies

Dance (hiphop, latin), music (vocal, piano, guitar), tennis, books
